Erasmus+

The headmistress's utterance

“The Erasmus+ Project has been implemented in the Velika Gorica Secondary School of Economics for three years. We are happy and proud to be included in the project which enables us to expand our views, to make new acquaintances and friendships, as well as vocational training of our students and teachers. Both of them visiting various European cities meet cultural and educational values which inevitably influence the quality of their work in our school. We strongly believe in having further chances to develop our successful cooperation with other schools and business partners in the Erasmus+ Project.”

Vesna Brkljačić,
headmistress

▶ “Project management in Portugal ”

2016/2017

Outcomes of the Project Management in Portugal

Our teachers, Anita Bilić Brdar and Igor Skupnjak, took part in their vocational training.

The training was held in Braga, a town situated in the north of Portugal from 10th till 14th October, 2016.

Church Sameiro – inside

During their daily eight-hour course the teachers acquired the knowledge and skills which would enable them to develop further

more demanding and better projects in our school.

In addition, they learnt more about the culture and lifestyle of Portugal and they visited a lot of cultural places in Porto, Braga and Viana do Castelo.

Activities Carried Out

During the course there were presented and trained the issues and activities on project management in the organisations, group processes, project supervision and control, integration of intention and planning, project requirements, planning of costs, quality assurance, human resources management, risk analysis, stocks management and ethical principles in project management.

There was paid a visit to MINHO University where startup entrepreneurs are given a professional help in project management.

Aims Fulfilled

Church Bom Jesus – outside

Enhancement of knowledge in school project management, new possibilities for the staff to develop new knowledge and skills in cooperation with other institutions via

eTwinning, expansion of viewpoints and motivation increase, development of intercultural, IKT and language skills, a unique international experience in professional development of the school staff,

recognizability and improvement of the school image as well as better reliance with various educational insti-

tutions, creators of educational policies and the community.

A special advantage of this project is further development of Erasmus+ projects between the Velika Gorica Secondary School of Economics and Braga Mobility Open.
